2 people have recommended Jacktszyi

"Jack joined JP Morgan's Admin Center Project as a senior Software Engineer. He is one of the most organized people I have ever met. Whenever I asked for something from Jack, he quickly pulled up tons of links and materials. I could always rely on him for correct information. In addition to his organization skills, he was a valuable team member, with great programming skills and attention to details. He was always ready to help team members. Some of the technologies he worked with on this project were Spring, Hibernate, HQL, JSF, Richfaces, CSS, Drools, JMS messaging, JUnit, Mockito and SOAP. He will be a valuable team member for any team."

—Farrah Qasem, Sr Software Engineer, Raytheon, worked directly with Jacktszyi at Accenture

"Jack has outstanding expertise on J2EE Web 2.0 and Spring technologies.We work together in JPMC project across releases, He did lot of work in Drool Rule Engine 5.1. He is an utmost professional with drive and dedication to produce results, he always likes to accept challenges and make the challenges look insignificant. He always tries to provide his helping hand to all the members in the team. Overall he is a very hardworking guy with a focused vision, All the best Jack."

—Rakesh Pathak, VP, JPMorgan Chase & Co., worked directly with Jacktszyi at Accenture
